

About our general nephrology clinics

We provide general kidney services for the population of northwest London through our 10 outreach nephrology clinics. The table below provides information about where these are located within the Clinical Commissioning Groups across our catchment area and how to contact our Nephrologist.

Primary Care E-advice Service for Patients with Chronic Kidney Disease (CKD)

To support GPs and practice staff manage their patients with CKD within primary care, clinicians can email our medical specialists with non-urgent clinical enquiries through our GP advice service at ICHC-tr.ckdadvice@nhs.net.

Our aim is to support GPs and practice staff in offering the right treatment and referral decisions for their patients with CKD via this accessible, secure, confidential and user-friendly system. And we hope that this approach will benefit patients so they can receive care closer to home.
