The Committee is asked to decide/review:

Hounslow’s Primary Care Committee is asked to:

1. **Note** the current position of primary and community care development in relation to integrated care in Hounslow

**Summary of purpose and scope of report**

The purpose of this paper is to provide Hounslow CCG’s Primary Care Commissioning Committee with an overview of the current stage of development for primary care in Hounslow.

**Quality & Safety/Patient Engagement/Impact on patient services:**

A Quality Impact Assessment (QIA) initial screening has been undertaken for the integrated care programme. As there are currently no specific service changes, no significant negative impact were noted, however the CCG needs to consider further work in the following areas.

- Further Patient and public engagement, specifically carers
- Review of impact on clinical and non-clinical staff
- Stakeholder communication regarding progress and intentions
- Review of monitoring arrangements.
- Oversight from Quality and Safety committee

The QIA is currently a working document to support the development of the Outline Business Case. It should be noted that this can only be fully completed once plans are in place for the service transformation and will therefore continue to be iterated until the final version of the Full Business Case is completed. The QIA will also be subject to further review and potential refinement during the mobilisation of these transformational changes.

**Finance, resources and QIPP**

The delegated primary care budgets alongside investment in the enhanced primary care contract will eventually form part of a **£104 million** integrated care contract.
Equality / Human Rights / Privacy impact analysis

An Equality & Health Inequalities Assessment (EQIA) initial screening has been undertaken for the integrated care programme. This screening has highlighted the need to conduct a full EQIA for the programme of work, specifically in regards to the below protected characteristics, who are more likely to be impacted by the four priority areas.

- Age
- Disability
- Pregnancy and maternity

A working EQIA has been started with the Outline Business Case however it should be noted that this can only be fully completed once plans are in place for the service transformation and will therefore continue to be iterated until the final version of the Full Business Case is completed. The EQIA will also be subject to further review and potential refinement during the mobilisation of these transformational changes.
