

# Chiswick Health Centre Development Proposal

## PURPOSE

NHS Hounslow Clinical Commissioning Group wish to engage with you, as a user of health care services at Chiswick Health Centre, to outline our vision to redevelop the building and the services provided within it.

## THE CURRENT HEALTH CENTRE

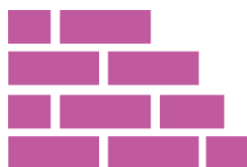

The existing building is not fit for purpose and is becoming increasingly expensive to maintain. There is an opportunity to improve the structure of the building and the facilities within it.

## INCREASE CLINICAL DEMAND

The London Borough of Hounslow is experiencing an increase in the demand for health and social care services due to the:

- increase in population; and
- ageing population.

## DEVELOPMENT PROPOSALS

NHS Hounslow Clinical Commissioning Group and NHS Property Services have been working with existing tenants of the current building to prepare development proposals for a new health centre that will also enable residential development.

## ENGAGEMENT PLANS

The following schedule of engagement is expected:

- **Wednesday 23rd October 1pm – 7pm**  
Public engagement drop-in session at Chiswick Health Centre (static display for 7 days post exhibition)

## YOUR VIEWS

We hope you will support this development proposal and look forward to receiving your views and comments through our project website:
